**DETAILED ACTION*****Claim Interpretations***

It is noted by the examiner that the instant claim 1 is a product by process claim. Therefore, for purposes of examination, the claim is interpreted as a product having a three dimensional structure and a continuously varying thickness and a smoothly topography. The materials falling within the scope of the instant claim 1 are any material; metal, any polymer, etc. The product by process claim simply requires a layer, and is not limited to any type of material.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kaminsky et al (2004/0081799).

Kaminsky et al disclose a three dimensional material comprising a substrate having thereon a polymer layer of a thickness of 25-150 microns thick ([0073]) having a smoothly varying topography. The difference between the peaks and valley heights is preferably less than 10 microns. When the material is 150 microns thick, it will be at least 100 microns in thickness, even at its thinnest points. Therefore it would have been obvious to one of ordinary skill in the art to prepare the material of the reference choosing to employ a thickness falling within the instant claim limitations. The resultant material would meet the limitations of the instant claim 1.

*Allowable Subject Matter*

2. The following is a statement of reasons for the indication of allowable subject matter: Claims 3, 5, and 6 are indicated as containing allowable subject matter as the prior art of record fails to teach the instantly claimed material having a layer of a smoothly varying thickness of no less than 100 microns.

*Conclusion*

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
